Documentation Details

Batch Information

Field	Value
Batch	Nordic Fashion Agency
Batch created	5 October 2026, 15:26 (UTC+02:00)
Images in batch	33
Documented	33
Not documented	0
Review required	2
Documentation events	152

Assessment Definitions

Disclosure indicated

The user has recorded that AI transparency information should be provided for the image, for example by labelling it as AI-generated or AI-edited when it is published.

No disclosure indicated

The user has recorded that no AI transparency disclosure is indicated for the image.

Review required

The user has not completed the relevant assessment or has marked the image for further review.

Not assessed

No transparency assessment has been recorded. This is not a legal determination.

Documentation Method

This report was generated from records entered by the user in RecordAI for Adobe Photoshop. RecordAI records the user's description of AI-assisted editing and does not independently analyse image content or detect AI usage.

Assessment statuses represent the user's recorded assessment. With the Auto option, the assessment is suggested from the recorded AI treatment and can be changed by the user. Assessments are documentation fields and do not constitute legal advice or a definitive legal determination.

Technical Information

Field	Value
Report format	2.0
Panel version	1.2.0
Application version	1.2.0
Photoshop version	27.11.0
Report ID	AI-2026-000022
Documentation events	152

Image Index

The image index records the current documentation state for each image in the batch.

Disclosure indicated (16)

The user has recorded that AI transparency information should be provided for the image, for example by labelling it as AI-generated or AI-edited when it is published.

#	File	AI treatment
1	C24D6455.jpg	Generative AI — Environment Addition; Motif Generation

About This Report

This report documents AI-assisted image editing as recorded by the user in RecordAI for Adobe Photoshop.

RecordAI does not analyse image content or independently detect AI usage. The report reflects the records entered by the user and the current documentation state at the time of generation.

Assessment statuses represent the user's recorded assessment and are not a legal determination or legal advice.

Report Metadata

Field	Value
Report ID	AI-2026-000022
Batch ID	batch-2026-0007
Report format	2.0
Panel version	1.2.0
Photoshop version	27.11.0
Generated	19 October 2026, 10:54 (UTC+02:00)

Data Integrity

RecordAI maintains local documentation records and an append-only event history for changes made within the batch. The report statistics and image index represent the recorded current state at the time the report was generated.
